

## Staff Spotlight

**Amy Juhl**

SLS Grade 4

We are spotlighting Ms. Juhl because of her extreme strength. She suffers from Sarcoidosis, a rare condition that causes small patches of red and swollen granulomas to develop in the lungs and lymph nodes. Her body always thinks it is sick and is constantly fighting itself. She has permanent scarring in her lungs from disease and COVID damage. There is no cure and it is painful! She doesn't complain and comes to school each day with a positive attitude for her students!
